6589. RE: NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2013)
Date: 2013-11-12 20:31:47 UTC
From: <dirk.claessens@...>
Topic: 5067 Message: 6589

Hi Roelof,

I wonder what's up with Vardo. I've just checked my logs, and there was another period in May 2012 where everybody suddenly started to send in perfect Vardo logs. After a month or so, this stopped.
I remember I emailed them asking if anything was changed to location/transmitter/antenna but never got an answer. I sometimes tend to think Bodo is standing in for Vardo??

Regards - Dirk

6590. Re: [navtexdx] RE: NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2013)
Date: 2013-11-12 20:53:09 UTC
From: Roelof Bakker
Topic: 5067 Message: 6590

Hello Dirk,

I don't think so as Bodo is still on and producing much less decodes than Vardo at the moment.

However, Geir can easily check this for us as he lives much closer to Bodo.

73,
Roelof

6591. NAVTEX log 2013.11.11 from South East Norway

6592. NAVTEX log 2013.11.12 from South East Norway

Yahoo group: navtexdx (2013)
Date: 2013-11-13 00:36:43 UTC
From: <la6lu@...>
Topic: 6592 Message: 6592

```
Report from : Geir Laastad / LA6LU
QTH : South East Norway
Locators : 59.41.21N 10.20.39E [JO59EQ]
Receiver : Icom IC-R75
Antenna1 : PA0RDT Mini-Whip
Antenna2 : RF Systems MLBA-MK2 20m LW
Antenna3 : Nasa Marine Active navtex whip
Navtex-Decoder : YaND 6.3

From midnight to midnight UTC
Each station once and +1000km only.

Hi Dirk and Roelf,

Both the Vardø and Bodø stations is on regularly, but since Bodø is under 1000km from me (853km) , I don't normally includes that one in my reports. However, since there have been some questions regarding Vardø and Bodø recently, I can start including them both in my reports when I get them.

2013-11-12 04:20:53> NORTWEGIAN
2013-11-12 04:20:57> GALE WARNING NO. 497

As a side note, I am happy to report that I am soon ready for longer DX too. I am almost finished burying my coax cables with the coax shields for both the PA0RDT and Nasa antennas also grounded (waterproof grounded under ground). It was/is a lot of work as I had to dig under some concrete too with plastic tubes all the way from my mast to my house wall. This will enable me to remove/replace/add coax cables in the future without having to dig it all up again. In a day or two more, my navtex.net internet pages will start containing a lot more stations and hopefully some good DX too. My old Navtex RX system is still (for now) operable, but yesterday the old system logged 181 Navtex stations and through the new system, I logged 334 stations. I have taken photos documenting how I have done the tubing etc. and will put them in the files section here later when all is finished. But so far, this seems to have helped a lot and that's a relief after all that digging :)

Regards
Geir
LA6LU

---In navtexdx@yahoogroups.com, <dirk.claessens@...> wrote:

Hi Roelof,

I wonder what's up with Vardo. I've just checked my logs, and there was another period in May 2012 where everybody suddenly started to send in perfect Vardo logs. After a month or so, this stopped.
I remember I emailed them asking if anything was changed to location/transmitter/antenna but never got an answer. I sometimes tend to think Bodo is standing in for Vardo??

Regards - Dirk

6604. Yadd 1.0

Yahoo group: navtexdx (2013)
Date: 2013-11-14 14:58:52 UTC
From: <dirk.claessens@...>
Topic: 6604 Message: 6604

Hello all,

YaDD 1.0 is available for download; see instructions below as they were sent to the beta team : John Pumford Green, Dave Onley, Martin Augustus and Stephen "TheAppleMac". I wish to express my sincere thanks to the testers for all the work done. Without your help, YaDD would not have been where it is today: V1.0 available in just over 2 months!

Special thanks go to John Pumford Green for providing invaluable information, test data and for the many interesting discussions. Thanks also to Dave for providing ehrm.. competitive software.

Regards - Dirk

Hello guys,

I guess this will be the last test before the public release.
To avoid another load of Yadd-chatter in navtexdx, below is a link to 4shared:

<http://www.4shared.com/file/X266F9WA/YaDDSetup1_0.html>
(disregard the commercial pop-ups, just click download, you may have to wait 20..30 seconds)

* Note that this is a "real" installer, not the usual collection of zipped files.
* Users of Vista/W7/W8 usually not logged with admin rights: change the proposed /..program files(x86) install path to C:\YaDD or whatever you prefer that is NOT under /programfiles.

* modem parameters restored to those of B09
* default autotuning = off.
* VHF channel numbers are now correctly decoded
* The latest version v03 of John's coast MMSI file is included.
* The included log database is mine, just to get you started
* I have included DBmanager as well, be careful with it...

* If you wish to run multiple instances of YaDD, you must install them in separate directories.
* Adding report lines to the REU/RNA report form is in Yand-style: shift-leftclick on the UTC field of the message you wish to add. (both report windows are freely editable, as in Yand)
* the "raw message" window under the log is also freely editable, you can add comments, etc..
* The log database interface is still bare-bones, more searching/filtering will be added later. (those of you familiar with SQL can use DBmanager)
* Finally, Yadd will not make a unique time-stamped session log anymore each time it is started. Instead, it will use the fixed name YADD_SESSIONLOG.TXT. IoW, this file will be overwritten on each startup. I expect this logging to disappear in the next version;

basically all info is stored in the database.

Regards - Dirk

Dirk,

its not a problem do take YADD on the wavetalk server, i think you can use the YAND-FTP transfer for this.
So its easyer for all to take YADD ;-)

Dietmar

6608. YaDD 1.0 now on NDB List website

Yahoo group: navtexdx (2013)
Date: 2013-11-14 16:05:41 UTC
From: Alan Gale
Topic: 6608 Message: 6608

Hi All,

You can now download a copy of YaDD 1.0 from the NDB List website at:

http://www.ndblist.info/datamodes.htm

the new program looks great, can't wait to get playing with it!:-)

Nice job Dirk and the beta testers, well done and thanks a lot.

73 for now, Alan.

Topic: 6604 Message: 6609

Hi All,

A simple set up YaDD DSC question: I've done some searching of the messages but can't seem to find what the bw the rx filters should be set to. I've seen everything from 170Hz to 3 kHz. I intend to use CW mode.

Don KPC6NDB

From: Don
Topic: 6604 Message: 6610

Never mind I figured it out myself, 300Hz. I just got a tx from CAMSPAC
as I changed the filter:

> 20:02:24> 12577.0: 120 120 041 031 092 000 000 108 000 036 069 099 000 118 126 126 126
126 126 126 126 122 014 122 122
> 20:02:24> FORMAT: SEL
> 20:02:24> CAT: SAF
> 20:02:24> TO: SHIP,413192000
> 20:02:24> FROM: COAST,003669990,USA,CAMSPAC Pt Reyes
> 20:02:24> TC1: TEST
> 20:02:24> TC2: NO INFO
> 20:02:24> FREQ: --
> 20:02:24> POS: --
> 20:02:24> EOS: ACK
> 20:02:24> cECC: 14 OK

The next steps would be to save it in the Perseus as 8414.5 and change
YaDD to 8414.5.

Dirk, put on some comfortable slippers and pour yourself an adult
beverage! Fine piece of work!

From: Dirk Claessens
Topic: 6604 Message: 6611

Hello Don,

300Hz is a bit too narrow, Perseus may snip off valuable signal information, especially for DX. The theoretical BW for a Navtex/DSC signal is ~ 350Hz.
I have my Perseus set to 400Hz to be on the safe side.

From: Don
Topic: 6604 Message: 6612

Hi Dirk,

Yeah, I thought about that later. Only one ship and two coast in ~4
hours here on the "left" coast of the USA. I'm 40 miles inland from the
two biggest and biziest ports on the coast.

6613. NAVTEX log 2013.11.14 from South East Norway

Yahoo group: navtexdx (2013)
Date: 2013-11-15 00:04:13 UTC
From: <la6lu@...>
Topic: 6613 Message: 6613

Hi all,

Probably because of a solar storm the condx seems to have dropped quite a bit and the noise level has grown too during the day at my loacation. So it has been unusually quiet here tonight. Anyway, here is what I have today :)

Report from : Geir Laastad / LA6LU
QTH : South East Norway
Locators : 59.41.21N 10.20.39E [JO59EQ]
Receiver : Icom IC-R75
Antenna1 : PA0RDT Mini-Whip
Antenna2 : RF Systems MLBA-MK2 20m LW
Antenna3 : Nasa Marine Active navtex whip
Navtex-Decoder : YaND 6.3

6614. the west coast...

Yahoo group: navtexdx (2013)
Date: 2013-11-15 00:17:09 UTC
From: Marc Goldman
Topic: 6614 Message: 6614

I too am on the West Coast.. near Monterey...

on HF there is a thing called Skip Zone I think we both can hear stuff “at sea” but not down the road a stretch..

I think we both would do well to go to channel 70 (156.525 MHz) and monitor DSC there... of course no DX....
I got a rather old scanner that works just fine for the purpose. I use SeaTTY which has HF and VHF GMDSS DSC mode... set up is different for starters FM and it uses 800 Hz shift I think the rest is pretty much the same.. (correct me if I am wrong!) . SeaTTY .. which I have had for a Good While is not free.. when I first got it and had to pay real hard earned money for it. (Boo Hoo!... Oh the Shame of It All !) it was for the weather fax software which other softwares did not have. the hams don’t normally use WEFAX... but this software is for maritime use.. same author as TrueTTY

Now having said that, It is time to listen some more.. but my impression was a lot of the messages I got were from Coast Guard Group Monterey.. teaching classes... something else.. fisherman.. which we have around here. DON’T want other fisherman to know where the fish are.. thus scramblers.. bootleggers on the digital channels of 2 meters where no one is listening or cares... and so on... so there was not much use here.. but at Long Beach the big guys have to use it by law.. but they are not fishing boats!!

6615. 518 Spanish for Caribbean ??

Yahoo group: navtexdx (2013)
Date: 2013-11-15 10:24:50 UTC
From: Jack Smith
Topic: 6615 Message: 6615

A friend of mine that is not a member of the NAVTEX group passed along the Spanish language message fragments below, received on 518 KHz around 0800 UTC 15 NOV 2013 from his location near Detroit Michigan.

From the geography mentioned, the most likely fit is the planned station at San Andreas Island Columbia, but all the information available on the Internet says the station is still "planned" and is not operational.

6617. Re: [navtexdx] Yadd 1.0 and a question about USCG

Yahoo group: navtexdx (2013)
Date: 2013-11-15 10:55:50 UTC
From: Roberto Rizzardi
Topic: 6604 Message: 6617

Ciao Dirk,

thanks and congratulations for your great job!

Looking at your log into the YaDD I want to ask you a question for
clarification.
In November, you have to log on 2187.5 kHz also the stations of the USCG.
But that would result from an official publication of the August 1, 2013
the activities of the U.S. Coast Guard on this frequency are completed,
as shown here:
http://www.navcen.uscg.gov/pdf/marcomms/2MHzDistressWatchkeepingClosureSafetyAlert.pdf

"Effective 01 August, 2013, the U. S. Coast Guard will terminate its
radio guard of the international voice
distress, safety and calling frequency 2182 kHz and the international
digital selective calling (DSC)
distress and safety frequency 2187.5 kHz. Additionally, marine
information and weather broadcasts
transmitted on 2670 kHz will terminate concurrently.

The Coast Guard will continue to maintain a continuous watch on VHF FM
channel 16 (156.8 MHz) and
on existing voice and DSC frequencies in the 4/6/8/12 MHz bands as
described in the Coast Guard
Navigation Center website
http://www.navcen.uscg.gov/?pageName=cgcommsCall. "

Did this not yet happened, or the assignment of MMSI is not correct?

73, Roby

Hello all,

Except VON, St. Johns, CAN, nothing at all was found from the other side
of the pond.
No trace of NMR either!

6619. Re: [navtexdx] Yadd 1.0 and a question about USCG

Yahoo group: navtexdx (2013)
Date: 2013-11-15 11:38:17 UTC
From: John Pumford-Green
Topic: 6604 Message: 6619

Hi Roberto!

I also saw the announcement that the USA were removing MF R/T and DSC,
but I am still seeing their signals regularoy on 2187.5kHz DSC.

Last night for example:

2013-11-15 07:07:05 2187.5 003669991 COMMSTA Boston, USA

RX:2187.5
SYMB: 120 120 000 036 069 099 010 108 000 036 069 099 010 118 126 126
126 126 126 126 126 127 099 062 127

FMT:SEL
CAT:SAF
TO:COAST,003669991,USA,COMMSTA Boston
FR:COAST,003669991,USA,COMMSTA Boston
TC1:TEST
TC2:NO INFO
FREQ:--
POS: --
EOS: EOS
ECC: 99 OK

It appears that the USGC have declared that they no longer carry out a
GMDSS safety watch on 2MHz - so that they can't be blamed for missing a
Distress call, perhaps> - but that they have not removed their 2MHz
equipment from service.

I hope they keep it on the air for a long time to come!

Cheers,

John

Thanks John for your answer.

What I want to know was that the signals were really from those stations
and that there were no doubts about the decoding, also saw your post on
3 November last about unknown ID.

73, Roby

6622. Best (SDR) receivers?

Yahoo group: navtexdx (2013)
Date: 2013-11-15 12:42:26 UTC
From: <la6lu@...>
Topic: 6622 Message: 6622

Hi all,

I have up to now used my Icom R-75 both for feeding two programs with Navtex signals (YaND and separately for my navtex.net web site). From now, I will use a dedicated Nasa Engine receiver for my web site so that my R-75 is free to do whatever I want. Unfortunately, I also want to sniff on NDB's, YaDD and general HF utils. That means that I will be unable to send in more navtex logs, until I get another receiver.

Ideally, I want a SDR radio with knobs (and IQ output) so I get the best of both world in one receiver. I only know about Alinco which does this, -Alinco DX-SR8T/E receiver and a brand new Alinco DX-SR9T tranceiver, currently only at the US market (as ususal :(

If the Alinco's is no way to go, I will probably buying a Perseus or a Winradio as I think these two are the best and perhaps has the widest spectrum on the screen.

I am interested in comments/oppinions regarding the Alinco's, Perseus and Winradio or eventual other receivers I have missed. I love the Klingenfuss lists and I also know Klinkegnfuss publish a frequency database specially tailored for the Perseus, so that gives the Perseus an advantage upfront.

I intend to post this on the navtextdx, ndblist and UDXF lists. I hope it's okay. You may email me directly with your suggestions / opinions if you want.

Thanks...

Regards
Geir

6625. New Navtex station on 490 kHz on next year from Piombino, Italy

Yahoo group: navtexdx (2013)
Date: 2013-11-15 13:48:50 UTC
From: Roberto Rizzardi
Topic: 6625 Message: 6625

Hi all,
a new Navtex station will be located in Piombino (GR), Italy, and will
be broadcast MSI in English language on frequency 490 kHz.
It will become fully operational by the end of 2014.

Here the document:
https://drive.google.com/file/d/0B4X2LuH3uKLgSHBYOHNOSU1aeDg/edit?usp=sharing

Hi Roby,

In addition to John's reply: don't pay attention to the included logs which were made during test runs of YaDD, repeated Perseus recordings, etc... I regularly forget to set the correct frequency in YaDD, so the COMMSTA stations were most likely received on 8MHz and 12 MHz.

Regards - Dirk

6627. Re: [navtexdx] 518 Spanish for Caribbean ??

Yahoo group: navtexdx (2013)
Date: 2013-11-15 15:24:27 UTC
From: Dirk Claessens
Topic: 6615 Message: 6627

Hello Jack,

My best guess is that these are test transmissons.
Also, the updating of status changes of Navtex stations can take a while.

Anyway, nice to know a new one is active!

Regards - Dirk

Thanks Dick, this is what I thought.

In the same way it was for YAND, right?
Since I did not deleted the log at the time when I installed the 6.1 version, do you know on what date are your YAND log into the software when it is installed?
Maybe 2011-01-18?
At that time I was not very active with the Navtex, although I think I know more or less when I entered my log.

Hi Roberto,

I have had DSCDecoder also monitoring 2187.5kHz continuously while
testing with YaDD and I see the following USA stations in DSCDecoder also:

[COMMSTA Portsmouth]-USA;(safety);from;[COMMSTA Portsmouth]-USA; test
EOS;13-11-13 02:25:21

271043241-TUR;(safety);from;[COMMSTA Boston]-USA; test ACK;13-11-10 00:51:32

[COMMSTA New Orleans]-USA;(safety);from;[COMMSTA New Orleans]-USA; test
EOS;13-11-06 07:17:31

636015972-LBR;(safety);from;[COMMSTA New Orleans]-USA; test ACK;13-11-05
07:19:59

[COMMSTA New Orleans]-USA;(safety);from;[COMMSTA New Orleans]-USA; test
EOS;13-11-05 07:20:18

[COMMSTA Portsmouth]-USA;(safety);from;[COMMSTA Portsmouth]-USA; test
EOS;13-11-04 22:26:00

[COMMSTA Boston]-USA;(safety);from;[COMMSTA Boston]-USA; test
EOS;13-11-02 01:34:16

[COMMSTA New Orleans]-USA;(safety);from;[COMMSTA New Orleans]-USA; test
EOS;13-10-28 05:53:04

BALTIC COVE,A8VG9-LBR;(safety);from;[COMMSTA Miami]-USA; test
ACK;13-10-28 06:27:35

370711000;(safety);from;[COMMSTA New Orleans]-USA; test ACK;13-10-28 08:13:5

There are many more loggings of USA Coastguard stations on 2187.5kHz in
my DSCDecoder logs...

I am absolutely sure that the USA Coastguard are still active on 2MHz DSC

Cheers,

John

6634. 518 KHz - Spanish Language

Yahoo group: navtexdx (2013)
Date: 2013-11-16 03:08:26 UTC
From: Jack Smith
Topic: 6634 Message: 6634

Looks like NMR - US Coast Guard - at San Juan Puerto Rico is
transmitting Spanish language weather.

Text below has the NMR ID letter, is transmitted in NMR's time slot and
also mentions San Juan weather service.

This must be new service never seen anything from NMR other than
English- although I haven't been printing 518 KHz for a couple weeks.

Jack K8ZOA
Clifton VA - near Washington DC
RX: RFSpace netSDR
Antenna: Clifton Laboratories Z1501F

20131116 0251 518 $04R NMR San Juan,PTR 2471

6635. A nice false ID in YaND: $12X Kodiak West

Yahoo group: navtexdx (2013)
Date: 2013-11-16 10:52:49 UTC
From: <dirk.claessens@...>
Topic: 6635 Message: 6635

Hi all,

Big surprise when inspecting the log: $12X Kodiak West!!
The reason is the keyword " ATTU " (note the spaces).

Message was from Ismailia, but YaND saw ID-letter X and ' ATTU ' first...

Aah well...

Regards - Dirk

Hello all,

I also received a fragmented message in Spanish at 02:59 UTC.
At this time I often find a scratch from NMR, Puorto Rico.
So, as mentioned before, I guess this is indeed a kind of test message
from NMR.

6638. Luebbecke: Almost out of nothing

Yahoo group: navtexdx (2013)
Date: 2013-11-16 11:20:55 UTC
From: <dl4ybp@...>
Topic: 6638 Message: 6638

Baku came up. What a surprise. And then a fragment of San Juan.

73

6639. Navtex log 15-16/11/2013 from Tuscany Coast

Yahoo group: navtexdx (2013)
Date: 2013-11-16 14:29:47 UTC
From: Roberto Rizzardi
Topic: 6639 Message: 6639

Hi all,
this night my first time of Cyprus.:-)
Here the log with some UNID (presumed in red text) and some stations on
490 kHz (in blue text).

73, Roby

Roberto Rizzardi
QTH: Porto Santo Stefano (GR) - Italy - JN52nk

6643. Re: [navtexdx] Luebbecke. Cyprus quite nicely

Yahoo group: navtexdx (2013)
Date: 2013-11-17 15:22:18 UTC
From: Dirk Claessens
Topic: 6642 Message: 6643

Hello Hans,

This is most likely 9X Ismailia (off schedule) fighting Bodo in the 00:10 time slot.

6644. Re: [navtexdx] Luebbecke. Cyprus quite nicely

Yahoo group: navtexdx (2013)
Date: 2013-11-17 16:12:52 UTC
From: Roelof Bakker
Topic: 6642 Message: 6644

Hello Hans,

I have a lot of rubbish at that time; see below.
My guess is Alger!

73,
Roelof, pa0rdt

From: <dl4ybp@...>
Topic: 6648 Message: 6648

boring I would say. However some nice catches from Astrakhan.

Thanks Roberto for your help. Algiers is it then, as Roelof also suspected. Not bad with the ALA pointing West <---> East.

Hi Dirk,

Thanks for the new Yadd. I'm running it now but I've downloaded it from your telenet site while 4shared throws so many ads at you and in the end my browser said the site was blocked because of phishing.

BTW what's the best signal calibration method here ?

And there is still a greyed out 518/490 kHz selection box.

73,

Guido.

Hi all,

you can use
http://www.yand.wavetalk.org/YaDDSetup1_0.exe
for download without any problems.

Dietmar

Hello all,

Excellent copy of Bodo and Vardo on both antennas.
However T/A reception is a bit thin!

Hi Guido,

What you've downloaded from the telenet site is a work-in-progress version of Yadd.exe. This will show an exception in the system log because of the missing database and other stuff.
You need the installer:

Follow Dietmar's link or use Alan Gale's website:
<http://www.ndblist.info/datamodes.htm>

For calibration: a Navtex signal is ideal.

Regards - Dirk

Hi Dirk,

Used Dietmar's link already. Thanks.
Thanks also for the calibration tip.

Guido.

Hi Hans,
in standalone mode I had the better result with my loop in W-E direction
on my QTH.
Poor result in N-S direction, cause much more noise.

73, Roby

6655. Greenland- Sardinia Logs Format

Yahoo group: navtexdx (2013)
Date: 2013-11-19 07:47:10 UTC
From: <stevesden1@...>
Topic: 6655 Message: 6655

Hi all....

Bit of info/advice please...

Received the following and looking for Station ID from below.....to condense to log format..
New to Navtex log formats ;)
Using YaND and ‘’now receiving window’’ gives OXI Nuuk,GRL and ICH La Maddalena,SA,ITA

Decode from Nuuk clipped on first couple of lines..

Raw Log

From: <stevesden1@...>
Topic: 6655 Message: 6657

Hi Giuliano,

Thanks for reply, very interesting you live close to Sardinia...

Thank you too about log being ok, am looking to condense into a format something like for example

20131117 1928 518 $01U ESA Talinn,EST 1560

Not sure where the example above eg $01U comes from so looking at how to reformat raw logs the correct way ;)

Many thanks..

Hi Giuliano,

Thanks for reply, very interesting you live close to Sardinia...

Thank you too about log being ok, am looking to condense into a format something like for example

20131117 1928 518 $01U ESA Talinn,EST 1560

Not sure where the example above eg $01U comes from so looking at how to reformat raw logs the correct way ;)

Many thanks..

Hi all....

Bit of info/advice please...

Received the following and looking for Station ID from below.....to condense to log format..

New to Navtex log formats ;)
Using YaND and ‘’now receiving window’’ gives OXI Nuuk,GRL and ICH La Maddalena,SA,ITA

Decode from Nuuk clipped on first couple of lines..

6659. Navtex Log 16-17/11/2013 from Tuscany Coast

Yahoo group: navtexdx (2013)
Date: 2013-11-19 14:26:33 UTC
From: Roberto Rizzardi
Topic: 6659 Message: 6659

Hi all,
sorry for delay due to my old crazy pc machine! :-[
It was a good night with many good messages.
Loop W-E and SeaTTY software.

73, Roby

Hello Roelof,

Thanks for reply and the decodes.....very interesting,,,,

Yand came up with

20131118 2342 518 $04W OXI Nuuk,GRL 3503

and was wondering it it came via Iceland? looks like it was about same time as your decode, message got clipped at start and only got

2013-11-18 23:42:15> ZCZC WA38

2013-11-18 23:42:17> 3~ 1250 ITC SEP 1~

Interesting you received...10 mins later..

20131118 2352 518 $01X TFA Grindavik,ISL 2045
2013-11-18 23:52:40> ZCZC XB92

Interesting Grindavik,ISL is Nav area 1 and Nuuk,GRL is Nav area 4
.

Got the hang of the report tool, early days for me on Navtex but learning fast),

Thanks Roelof

73 - Steve

Hello Vern,

Propagation is rather poor and I have not logged any northern Canadian NDB
for weeks.
And yes, LT-305 has disappeared from the face of the earth!

73,
Roelof

6669. Fw: [dgnavlist] REU Navtex logs from Whitley Bay

Subject: [dgnavlist] REU Navtex logs from Whitley Bay

Hello All,

It's been a while since my last report and it looks like conditions have taken a tumble since then but still some catches over 1500km.

Mike Thayne, g3gms
Location: Whitley Bay, England, IO95gb
Receiver: Homemade Softrock Ensemble II with
HDSDR software.
Decoder: YaND 6_3D.
Computer: Dual CPU 2.2Ghz, RAM 2.00GB
with internal soundcard.
Antenna: ALA100M 1m sides square loop.

6671. Navtex Log from Antwerp, BEL 20131121

Yahoo group: navtexdx (2013)
Date: 2013-11-21 21:08:15 UTC
From: Dirk Claessens
Topic: 6671 Message: 6671

Hello all,

As Roelof said: good propagation from the North (Saudanes was some time ago)

Not a trace of Canadians though.

Cheers - Dirk

```

6672. Navtex 4209.5 kHz

Yahoo group: navtexdx (2013)
Date: 2013-11-22 07:31:45 UTC
From: <stevesden1@...>
Topic: 6672 Message: 6672

Hi Dirk,

Dirk would it be possible at some stage with YaND to include the option of receiving Navtex 4209.5 kHz from the frequency option menu?
Would be very interested to hear your thoughts on this...

Hi Steve,

Adding a frequency selection box would be the simple part.
But the selected working frequency is deeply integrated in Yand and is used in many places. (filters, ID lookups, schedule look ups, etc..)

The use of ID-letters on HF Navtex is not compulsory. AFAIK only USCG stations use them in a sensible way (although not always)

A few years ago I attempted to implement this and had to stop after a a few days. The practical implications were just to far-reaching.

Regards - Dirk

Hi Dirk,

Many thanks for the reply..

Does sound like a lot of work and can understand why the implementation was taken no further..
Can understand too with your on going development of YaDD then anything else could be a bit too much)

I see YaND asTHE Navtex decoder and mentioned the frequency as an idea to round up Navtex decoding..

I will monitor the frequency for a bit, see what turns up, been a few years since been on 4209.5..

Log wise not a problem, just change 490 or 518 to 4209.5
Translation is not hard of non English text, cut-paste and use Google translator..
Will be interesting to see over a few days which stations use it ;)

Thanks Dirk...

Subject: [navtexdx] Navtex 4209.5 kHz

Hi Dirk,

Dirk would it be possible at some stage with YaND to include the option of receiving Navtex 4209.5 kHz from the frequency option menu?
Would be very interested to hear your thoughts on this...

Hi all,
tonight I had 3 false ID using YaND software, even if the keywords are
correct for the right station.
Here the log.

6685. Re: [navtexdx] Navtex Log 23-24/11/2013 from Tuscany Coast

Yahoo group: navtexdx (2013)
Date: 2013-11-24 19:50:00 UTC
From: Dirk Claessens
Topic: 6684 Message: 6685

Hello Roberto,

You're the very first to report this.

What you received was most likely Valencia(!), ESP, and the only way I can see Yand could come up with Valentia(!),IRL is when the keywords of 3X Valencia were copy/pasted into 1W Valentia's location. As you can see, several key words specific for Valencia are present in the Valentia logs you posted.

Below are the keywords of Valentia,IRL as they should appear on Yand's database tab:

1W Valentia:

VALENTIA,IRELAND,FASTNET,METAREA 1,MET EIREANN,S H A N N O N,SHANNON,FITZROY,IRISH SEA
VALENTIA COAST GUARD,/EJK

I'm afraid you've messed up Yand's database...

Regards - Dirk

Date: 2013-11-24 20:36:23 UTC
From: <denno9@...>
Topic: 6684 Message: 6687

Hello Roberto and Dirk,
I also received the the 23/11 - 2340 message. I thought it was LaGarde with same Slot W as Valentia and the keyword Ireland contained in the weather forecast produced the ID. Interesting.

Hello Roberto,

You're the very first to report this.

What you received was most likely Valencia(!), ESP, and the only way I can see Yand could come up with Valentia(!),IRL is when the keywords of 3X Valencia were copy/pasted into 1W Valentia's location. As you can see, several key words specific for Valencia are present in the Valentia logs you posted.

Below are the keywords of Valentia,IRL as they should appear on Yand's database tab:

1W Valentia:

VALENTIA,IRELAND,FASTNET,METAREA 1,MET EIREANN,S H A N N O N,SHANNON,FITZROY,IRISH SEA
VALENTIA COAST GUARD,/EJK

I'm afraid you've messed up Yand's database...

Regards - Dirk

Subject: [navtexdx] Navtex Log 23-24/11/2013 from Tuscany Coast

Hi all,
tonight I had 3 false ID using YaND software, even if the keywords are correct for the right station.
Here the log.

Roberto Rizzardi

From: Roberto Biagiotti
Topic: 6684 Message: 6688

Hi Dirk and Roberto
I have had the same problem last night, and also in this moment, and I don't thik this come from wrong database keywords.
Please check my raw log during La Garde slot:

20131124 1940 518 $01W EJK Valentia,IRL 1895

Thanks Roelof,

Svalbard it is, also on the whip here.
I don't think it would have made it on the loop!

Rgds - Dirk

From: Dirk Claessens
Topic: 6684 Message: 6691

Hi Roberto (both of them :0)

Oops, I guess I owe Roberto Rizzardi an apology for accusing him of messing up the database! I couldn't check myself because La Garde/Valentia/Valencia are on my "don not log" list. The reason for the wrong ID was of course the sentence

HIGH 1035 OVER IRELAND, combined with the W identifier.

As I explained in an earlier message, there is room for further refinement of Yand's ID-process.

Regards - Dirk

Hi All.....

Info request here if possible ref. Navtex Station header to decode station location...

Looking for a source of reference to decode station location for eg that come up UNID

I understand some transmissions do repeat the code but some just the once at start of transmission and if that that is missed then comes up UNID
In other words what code is required to give station location..

Examples here of UNID

20131124 2120 518 $00I UNID 0

2013-11-24 21:20:58> ZCZC IA02

2013-11-24 21:21:01> NO MESSAGES ON HAND

Topic: 6692 Message: 6694

Hi Steve,

The first UNID contains no information at all to identify it.
The only clue is the time slot: 21:20 utc. On 518, this could be Varberg, Las Palmas, Izmir or Upernavik according to Yand's schedule list. No way to tell which one.

The second one is clearly not in English, so I assume it was logged on 490 KHz.
Although "ITALIANO" is mentioned, the language is Spanish: " ISLS BA~EARES" = ISLAS BALEARES = Balearic Islands. Also CABLERO ITALIANO = Italian cable layer (ship). Again the time slot gives a clue: at 490 KHz 22:00 3M Cabo de la Nao,ESP appears in YanD's schedule list.

Finally, from page 8 of the manual:

"If Yand failed to identify the station (or did so but incorrectly which should be rare), the ID-letter and
the navarea can be forced in the following way:
-Double-click on the B1 field of the record (or click once and press Enter)
-Enter the B1 character in CAPITALS.
-Leave the field with the up- or down-arrow key.
Repeat the above for the NAVAREA field. Yand should now have filled in the station name and country code. If the stations remains UNID, you have specified an unassigned ID-letter for the
specified navarea."

Regards - Dirk

Hi Dirk,

Thank you for the reply and info, which is excellent, am reading and re-reading the manual...

Bear with me Dirk as being a beginner could you explain '' -Enter the B1 character in CAPITALS.'' or indeed what is B1?
Sorry to be so slow ;)

Regards - Steve

6697. Re: [navtexdx] Navtex Log 23-24/11/2013 from Tuscany Coast

Yahoo group: navtexdx (2013)
Date: 2013-11-25 18:20:26 UTC
From: Roberto Rizzardi
Topic: 6684 Message: 6697

Hi Dirk and all,

in my YaND database for Valentia,IRL the keywords are:
VALENTIA, IRELAND, FASTNET, METAREA 1, MET EIREANN, S H A N N O N,
SHANNON, FITZROY, IRISH SEA

For La Garde,FRA are:
AVURNAV, PROVENCE, LION, LANGUEDOC, CORSE, PROVENCE, AZUR, METEO-FRANCE,
LA GARDE MRCC

For Valencia,ESP are:
SPAIN, SAN JORGE, MALLORCA, BALEARES, CRISTO, AEMET, SPANISH

The messages at 23:40 and 07:40 I guess they are from La Garde,FRA and I
don't know why the software didn't assumed the first keyword
"METEO-FRANCE" to identify the location.

For the same reason it is the message at 07:09, although there is not a
slot for La Garde, FRA in this time, but even for Valentia,IRL.

I think that what was done, not only to me, can be helpful to improve
the correct identification of the stations.

73, Roby

6698. Re: [navtexdx] New Navtex station on 490 kHz on next year from Piombino, Italy

Yahoo group: navtexdx (2013)
Date: 2013-11-25 22:48:32 UTC
From: Roberto Rizzardi
Topic: 6625 Message: 6698

Piombino is in Livorno province (LI), not in Grosseto (GR).
Sorry for mistake.

Thanks to my friend Enzo. ;-)

73, Roby

6699. Re: [navtexdx] New Navtex station on 490 kHz on next year from Piombino, Italy

Yahoo group: navtexdx (2013)
Date: 2013-11-26 01:35:14 UTC
From: la6lu@online.no
Topic: 6625 Message: 6699

Hi,

I got an email via my www.navtex.net web site today, but he/she is from Japan and the forming of the sentences is somewhat difficult for me to understand 100%. Perhaps some of you can help me "decode" this better than I. The letter mentions the "masters" and I think the main point is that a ship's crew has difficulties knowing how long a navigational warning is valid . Any opinions?

Regards
Geir
LA6LU

How to confim NAVTEX message(only navigational warning) is valid *Enter your message::* Dear Sir/ Madam We are management company of the vessels and have some question of NAVTEX system. In case of navigational warning received via EGC, cancelled date is specifed and we can see whether this EGC navigational message is valid or not based on its cancelled date. However, In case of navigational warning received from NAVTEX, cancelled date depands on NAVTEX broadcast station and most of NAVTEX message do not provide cancelled date. therefore, our crews have much difficulty with use of NAVTEX navigational warnings. I have advised the masters, NAVTEX broadcasting station send only navigational warnings in force at that time of broadcasting. in other words, they repeatedly send navigational warnings in force. There for the master cancelled all navigational message when departing from that area and all navigational wanrings in force can be received when entering again in that area. It would be appreciated if you can confirm above my understanding is correct and how to confirm navigational warning received via NAVTEX is vaild or not. I'm looking forward to hearing from you soon. Best Regards, Supt.S.H.Lee

6700. How to confim NAVTEX message(only navigational warning) is valid

Sorry, my previous post had a wrong subject line on it, this is the
right one. But in my opinion, at least for the Norwegian navtex
messages, a navigational warning is repeated as long as they are in
force. I.e. if a light house is unlit, that is re-transmitted until it's
fixed.

Regards
Geir

Hello Geir,

That is also my understanding. A "real" Navtex receiver keeps a list of recently received messages and will not list duplicates. (The message numbers ZCZC XYnnn are unique per station). Most receivers have an option to automatically delete messages older than xx hours, as the ship most likely will be in another navtex service by that time.

Regards - Dirk

P.S. A "master" = the captain of a ship

6703. Re: [navtexdx] How to confim NAVTEX message(only navigational warning) is valid

Yahoo group: navtexdx (2013)
Date: 2013-11-26 11:36:56 UTC
From: la6lu@online.no
Topic: 6625 Message: 6703

Hi Dirk,

Yes, that's right but I think some equipment also discards the old duplicate and replaces it with the new one so ship crews can see the most recent time that message was last transmitted.

I did a bit duckduckgo's on the senders email address and found this at http://www.smatokyo.co.jp/:

/High quality ship management and support services for all kind of vessels /

//

/Star Management Assocaites(SMA) offers a full range of high-quality ship management//
//and support services to cover all kind of commercial vessels,include; /

//
//

/-Technical management//
//-Crew management//
//-A complete Safety management system//
//-Purchasing services//
//-Project management for newbuilding projects//
//-Audits and inspection services//
//-Monitoring ship's performance//
//-Dry-dock arrangement//
//-Insurance arrangement /

Regards
Geir

From: <dl4ybp@...>
Topic: 6704 Message: 6704

came in last night on 518 kHz. Quite nice to see Sao Miguel again. Sydney was only a tiny fragment. Else nothing to report.

Hi Dirk,

I have been playing a bit with it and am quite impressed. And beautiful to look at.
You need to be very fast if you want to use the signal calibration. Something for the gamers among the group. ;-)

Hello Hans,

You can perfectly use a Navtex signal for calibration.
Baudrate, shift and modulation are the same as for DSC.

Regards - Dirk

Hans

Use the calibration .wav file that comes with YaND, it works perfectly.

6717. RE: [navtexdx] BT Scan?

Yahoo group: navtexdx (2013)
Date: 2013-11-28 21:13:29 UTC
From: R.Connolly
Topic: 6715 Message: 6717

Hi Steve,

I suspect what has happened is the information was sent to Niton by email and whoever prepared the message for navtex transmission removed the headers but forgot to remove the bottom section that says the email has been scanned by BT Assure which is a higher level anti virus, antimalware etc system used by large businesses and government agencies. I have noticed on several occasions that emailed MSI has not been cleaned back to just the actual message. The navtex signal that has been transmitted has not been scanned, just the source information received before transmission.

Hi Robert,

Thank you for the very informative reply, very interesting!

The preparation of Navtex and sending the data is something that is very new to me and interesting it is sent by email.....never knew that)

I did think that the transmission was an automated process but having thought it through there has to Be some human input ;))

Your explanation of BT Assure holds good backed up by line THE SERVICE IS DELIVERED IN PARTNERSHIP WITH SYMANTEC.CLOUD..

Many thanks Robert!

Hi Steve,

I suspect what has happened is the information was sent to Niton by email and whoever prepared the message for navtex transmission removed the headers but forgot to remove the bottom section that says the email has been scanned by BT Assure which is a higher level anti virus, antimalware etc system used by large businesses and government agencies. I have noticed on several occasions that emailed MSI has not been cleaned back to just the actual message. The navtex signal that has been transmitted has not been scanned, just the source information received before transmission.

Date: 2013-11-30 10:02:40 UTC
From: Roelof Bakker
Topic: 5067 Message: 6722

Hello Dirk,

I believe this is the second time that I had a decode starting at 00:00:00 UTC, which is very rare.
Just like the previous time, the date is correct displayed by YaND, but the time has been skipped.

Regarding conditions, not very good at all and this seems to apply to all directions.

6727. Re: [navtexdx] NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2013)
Date: 2013-11-30 16:11:26 UTC
From: Dirk Claessens
Topic: 5067 Message: 6727

Hi Roelof,

I'v been browsing through my notes and indeed: this is a documented bug in Delphi 7 Enterprise. A system procedure that converts time (internally represented as a fractional number) to a printable string, for a time exactly equal to 00:00:00 returns a blank. The problem even propagates into the database. When I (with DBManager) change the utc_received field of a record that previously showed, say , "2009-08-04 00:40:29" to "2009-08-04 00:00:00", it automagically changes to "2009-08-04". Unfortunately I don't have the source code of the (free) Absolute Database Engine, so there's not much I can do. We'll have to live with it I guess.

Or maybe we could kindly ask the station managers of the 00:00 time slot to start transmissions at 00:00:01? :0)

Regards - Dirk

Hello David,

Possibly, yes (you didn't show the Vardo log)
The Baku transmission was off-schedule, this is possible/allowed in case of messages deemed urgent. Vardo's time slot indeed starts at 20:20 UTC.

Regards - Dirk

6747. RNA NAVTEX in NUT

Yahoo group: navtexdx (2013)
Date: 2013-12-02 23:25:57 UTC
From: Mark Ku7z
Topic: 6747 Message: 6747

Went through my NAVTEX logging's in Seatty for November to see what I
caught and found a hit from Japan back on the 6th. Had good conditions
the last couple of days on 518. Need to switch to 490 and 424 to see
what I can catch there.

6748. RFI and use of antenna common mode chokes

Yahoo group: navtexdx (2013)
Date: 2013-12-03 01:56:57 UTC
From: la6lu@online.no
Topic: 6747 Message: 6748

Hi,

I am looking to improve my navtex and general dx, so I have just ordered a bulk of different ferrite rings from ebay in a serious attempt to make my environment less noisy in the future. I will soon go over the inside of my house and place ferrite chokes on the leads on every usual suspect source, like tv and switch mode supplies etc..

All of those noisy 12 volts switch mode adapters I used to have in my shack are already retired. I am using a 100 Ah 12 volts battery instead. This is charged with a fully automatic 15 amp charger by the middle of the day when I'm not here and navtex reception is more or less absent anyway. The charger itself is controlled by a separate on/off electronic timer which switches on the charger and charges the battery for two hours before the charger is switched completely off again. This change also gave me the added benefit of being able to continuously receive & computer log the navtex transmissions even when a mains power failure happens (which it just did for 3 hours recently).

But I am wondering if some of you are using common mode ferrite chokes on your rx coaxes? If so, how many (places) and where in the feed line is it best? My coaxes is buried and grounded (under ground), but if have to I will dig them up and put chokes where it's best. My thoughts right now are one choke as close as possible to each of the antennas and one near the receiver for each coax.

At this QTH, I do not transmit, so no need to protect from RF from a close by transmitter here. I just want to lower the noise floor.

Any tip regarding RFI noise reduction / common mode chokes is appreciated. Thanks...

Regards
Geir
LA6LU

6749. Navtex Logs from Warrington,ENG

Topic: 5067 Message: 6754

Hello all,

Good propagation from Ismalia, Egypt, Bodo, Vardo and Baku.
However T/A reception was not very good!
Just NMR, Puorto Rico and a few snippets which are probably from Canada.

Hello Dryden,

Nice catch! (and not even a shred of it here)
I have logged Simiutaq only 2 times; last time was about a year ago:

2013-01-12 22:01:12 41> ZCZC MC31 ,
2013-01-12 22:01:16 39> 12-201(UTC JAN 13
2013-01-12 22:01:18 32> GREENLAND SIMIUTAQ
2013-01-12 22:01:25 34> WARNING OF ICE ACCRETION~FOR:
2013-01-12 22:01:27 38> NUNARSUIT:
2013-01-12 22:01:35 35> [LOCALLY] RISF (9 ICEW ~ACCRETION9NARSELIK:
2013-01-12 22:01:40 37> [LOCALLY] ~ISKJ OF ICE ACCNETION.
2013-01-12 22:01:41 33> ~NNNN

As you can see, message content is very similar to what you received.

Cheers - Dirk

6773. NAVTEX Log 05/06 Nov From Corby UK

Yahoo group: navtexdx (2013)
Date: 2013-12-06 13:36:26 UTC
From: <denno9@...>
Topic: 6773 Message: 6773

Hello all, Unusually for here logged Canadian stations at four times. Maybe not all down to propagation, they are out of/end of time slot except for St Johns 22:13 which for a change wasn't QRM'd by LFO Orlandet.which is strong here.

6774. Navtex log from Foristell, MO

Yahoo group: navtexdx (2013)
Date: 2013-12-06 15:54:55 UTC
From: PalmerRD@...
Topic: 6774 Message: 6774

Foristell, Missouri
Receiver: ICOM R-75
Antenna: Clifton Z1501 active, base up 25 foot, 10 foot whip
Software: SeaTTY 2.37
A fairly good night with 15 different stations logged. Missed a clean sweep of Canada
by only two stations, $04H from Ferndale, ON and $12D from Prince Rupert, BC. Somewhat
strange as $04H is usually a regular. Nice of $04T to send a gale warning out of their timeslot.

Hello Hans,

<23:29:43> MA_INE WRNI_GS F_R NEW_O_NDLAND
SSSUED

This obviously MARINE WARNINGS FOR NEW FOUNDLAND ISSUED

Both Sydney and St. John's use this exact sentence in their warnings, but given the time I'm pretty sure it was St. John's you received. I have logged many of them around that time.

Regards - Dirk

6781. Navtex Log 06-07/12/2013 from Tuscany Coast

Yahoo group: navtexdx (2013)
Date: 2013-12-07 12:29:14 UTC
From: Roberto Rizzardi
Topic: 6781 Message: 6781

Hi all,
for first time I used the RTTY mode to decode messagges with YaND,
instead USB as usual, and I had the best results in this time.
Her the log with some UNID.

20131207 0011 518 $00? UNID 0

I think that UNID was UDN Novorossiysk,RUS.
It should be my first time!

Hi Roberto,

Sure looks like it: KE~CH~~SK~Y S~RAIT = KERCHENSKIY STRAIT, a keyword for Novorossyisk.
Below is what I received around that time.

Cheers - Dirk

Thanks Dirk and Roelof for the confirm.
A good new one!

Hi Giuliano,

Thanks for your report.

I have enter your log on REU (http://www.classaxe.com/dx/ndb/reu).

I need your grid locator.

Enjoy DX'ing !

From: <dirk.claessens@...>
Topic: 6791 Message: 6791

Hi akk,

Oops, forgot to post yesterday's log.
No sign of T/A, but I received the longest sequences of messages from Bahrein ever!

Cheers - Dirk

Hello all,

This morning at 04:00 UTC the Kyoto Dst statted a deep dive to -71 at
09:00 UTC.
It is now back to -54 and lets hope it will recover quickly.
I guess DX propagation will be mediocre at best for the next ten days!

6795. WWSU 6.4 release

Yahoo group: navtexdx (2013)
Date: 2013-12-08 10:57:53 UTC
From: David Onley
Topic: 6795 Message: 6795

A really fine effort by Alex and all the beta testers. A nice improvement for NDB, DSC, Navtex and DGPS logs

http://www.ve3gop.com/files_new/files.html

Topic: 6795 Message: 6796

Hi All,

Yes, installation went OK here as well.

I wonder if it might be better to install future programs in the C:\
directory now as Microsoft continues to play around with the
subdirectory security with every new version? Already a pain for
networking XP/Vista/W7 PC's. I would be glad to stick with XP but Vista
W7 do have some advantages.

A poor night for T/A signals with just a few unidentified fragments
apart from one good decode from St John's.

6802. NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2013)
Date: 2013-12-09 13:05:36 UTC
From: Roelof Bakker
Topic: 5067 Message: 6802

Hello all,

Propagation is a weird thing.
Yesterday the Kyoto Dst dropped to -71 at 09:00 UTC and rose quickly to
-31 at 13:00 UTC.
Since then it has hovered around that figure and is slowly rising to the
lower twentieths.

A similar event in e.g. the month October would have wiped out most if not
all propagation from the north.
However at the moment the only station effected seems to be Archangelsk.
Bjuroclubb, Bodo and Vardo don't suffer at all. I also found a couple of
good decodes from Canada last night.

6805. Navtex Log from Antwerp, BEL 20131209

Yahoo group: navtexdx (2013)
Date: 2013-12-09 16:07:22 UTC
From: <dirk.claessens@...>
Topic: 6805 Message: 6805

Hi all,

I agree with Roelof, despite a strongly negative Kyoto index, conditions are not too bad at all. It's a long time ago I could log a complete message from San Juan!

Cheers - Dirk

Report from : Dirk Claessens
QTH : South of Antwerp, Belgium
Locators : 51.07.23N 04.28.03E [JO21je]
Receiver : Perseus SDR, Lowe HF225
Antenna1 : paOrdt Mini-Whip @ 5m
Antenna2 : lz1aq/paordt 1mtr wideband loop
Navtex-Decoder : YaND 6.3

From: Roberto Rizzardi
Topic: 5067 Message: 6810

Hi Roelof,
I see in your messages that you use the AGC slow in Navtex: did you test
better result instead AGC fast?
I supposed the AGC fast is the best way to decode the digital signals.
What do you think?

Hello Roberto,

I have never tested this on weak signals.
My PERSEUS is set to AGC slow and my Afedri to medium.

I will use a PERSEUS recording and run decodes on the same signal with AGC
Fast, Medium and Slow.
I will let you know how it works.

For weak level AM and NDB reception in CW mode, I always use AGC OFF.
However this causes severe overload on local NAVTEX stations.
But it might be interesting to test this as well.

I will report my results here!

73,
Roelof

6812. Re: [navtexdx] About AGC slow or fast

Topic: 5067 Message: 6812

Hi Roberto,

I use a fairly old ordinary receiver, not a DRS and there is no facility

for turning the AGC off.

I would have thought that the FAST mode would have been better

for Navtex as the receiver would go to max gain as soon as the strong

sigal disappeared.

This does not seem to be the case and from quite a few experiments

I find that the SLOW mode gives better results.

This is on the PALSTAR R 30.

Cheers

Bob

Thanks Roelof and Bob for your contribution.

We know that it is not only important the signal level, but even more the signal to noise ratio.
I happened to receive weak signals and in this case I noticed that "AGC off" helped a lot, especially if in the presence of atmospheric disturbances, as they are amplified by the AGC circuit active, whether it was fast or slow, covering the signal.
On the other hand, in the presence of highly variable or strong signals AGC is necessary to limit the level and avoid any distortions that may alter decoding.

By live listening we can act directly in real time according to the propagation conditions, but when we work in standalone it is important to set well our receiver so you do not miss any signal.
For this reason it is important to find the right setting of the AGC.

Compared with the conventional receivers, the SDR offer greater possibilities for action in posterior to improve the readability of the received signals.

6817. Introduce myself

Yahoo group: navtexdx (2013)
Date: 2013-12-10 14:06:15 UTC
From: John Bruce McCreath
Topic: 5067 Message: 6817

Hello everyone....finally got signed up to the group yesterday and I thought I'd better introduce myself.
My name is Bruce and I live in the village of Saltford, ON, Canada, close to the shore of Lake Huron.
I've been Navtex DXing for about 3-4 years and my best DX so far is station $15K in Puerto Montt,
Chile, at about 5900 miles according to Google Maps distance calculator.

73, Bruce, VE3EAR

> Are you still running your beacon around 185khz...

Yup, sure am, on 188.830 kHz.! We had storm force winds off the lake last night and I was worried about my
antennas. While walking our husky this morning, I had a chance to check them out and they all survived.

73, Bruce

6825. My Navtex rugulars

Yahoo group: navtexdx (2013)
Date: 2013-12-11 03:44:26 UTC
From: John Bruce McCreath
Topic: 6824 Message: 6825

These are the Navtex stations that I receive regularly over a 24 hour period.
All are in area $04 along the east coast of Canada and the USA, except for
H and P, which are on Georgian Bay (Lake Huron) and Lake Superior of the
Great Lakes, respectively.

A NMA Miami, Florida, USA 2000 km.
B ZBR Bermuda 1960 km.
C VCK Riviere au Renard, QC, Canada 1440 km.
E NME Charleston, South Carolina, USA 1230 km.
F NMF Boston, Massachusetts, USA 880 km.
G NMG New Orleans, Louisiana, USA 1700 km.
H XMJ Wiarton, Ontario, Canada 120 km. *
N NMN Chesapeake, Virginia, USA 900 km.
P XLJ Thunder Bay, ON, Canada 780 km.
Q VCO Sydney, NS, Canada 1700 km.
R NMR Puerto Rico 3170 km.
U VAR Saint John, NB, Canada 1250 km.

* Has been off the air for the last 4-5 weeks, reason unknown.

73, Bruce, VE3EAR

6826. My station details

Hi Bruce,

First off, welcome to the group!
What a quiet Navtex schedule you have over there.
Here in Europe navtex stations are stumbling over each other; about 45 stations can regularly be heard here, many of them fighting each other in the same time slot.

Regards - Dirk

6834. Re: [navtexdx] Frequencies

Yahoo group: navtexdx (2013)
Date: 2013-12-11 15:22:18 UTC
From: John Bruce McCreath
Topic: 6828 Message: 6834

I log the Navtex/SITOR-B transmissions on 8416.5 kHz. from NMC Pt. Reyes, NMO Honolulu, and VFF Iqaluit most nights.
On 4209.5 kHz. I've managed to snag Turk Radio from Istanbul several times, but have had no luck at all getting anything
on 4210 kHz. despite there being alleged activity on that frequency. NMF Boston comes in on 6314 kHz. well, being sort
of a "local" for me.

73, Bruce

6836. Navtex Log 10-11/12/2013 from Tuscany Coast

Yahoo group: navtexdx (2013)
Date: 2013-12-11 18:46:28 UTC
From: Roberto Rizzardi
Topic: 6836 Message: 6836

Hi all,
the signals seems low, but with less noise than usual.
I catched Jeloya,NOR for first time.
In standalone mode I decoded three stations in the same slot at 01:00
utc: Tarifa,ESP - Cullercoats,ENG - Irakleion,GRC.
In these days I used the AGC slow and it seems a good setting.

Can you help me for the UNIDs in this log?

Roberto Rizzardi
QTH: Porto Santo Stefano (GR) - Italy - JN52nk
RX: IC-R71E
ANT: 75 cm side square MW tunable loop

Hi Roberto,

The "no message on hand" messages are unidentifiable, too many candidates in that time slot.

2013-12-10 21:31:16 01> ~NALTI~~K~~ARBO~URTA~PR~CH
2013-12-10 21:31:27 01> VDMOJT~~U~L~I~SK SLS~ [WATER] ~L~PHT
B~~Y~NO~~~{}TM~E M~SSICG
2013-12-10 21:31:32 01> CAC~EL~ K~LI~INGR~D NAV W~RN 1~0
2013-12-10 21:31:33 01> NNNN

CAC~EL~ K~LI~INGR~D NAV W~RN 1~0 looks like :

CANCEL KALININGRAD NAV WARN

There are 2 stations that mention Kaliningrad regularly in their messages: Gislovshammar and Bjuroklubb. Since time of reception is 2130, this must have been Gislovshammar.

Regards - Dirk

Hi all,

Just in on 4209.5KHz. TAH Istanbul have switched their channel marker off. Interesting DX is then possible.

Regards - Dirk

Hello Roberto, I have logged this UNID 9 times in about 3 weeks. The only thing I can add is that I don't think it is Varburg, Las Palmas or Izmir, because in at least one of those logged time slots each one has sent a message. So in theory that leaves Upernavik (Grn), Port Elizabeth (AFS) or Yokohama (JPN). Upernavik is surely the only possibility? but the decode is usually 100% clean. Mystery! Could it be a test signal?

Hi Dryden,
I didn't received any message from Varburg and Izmir in that time and in
that day. Did you received?
On my reception conditions I don't think I'm able to receive Upernavik.
The mystery will continue...

6844. Greenland DX on 518

Yahoo group: navtexdx (2013)
Date: 2013-12-12 03:39:28 UTC
From: John Bruce McCreath
Topic: 6844 Message: 6844

Upon checking my Navtex decoder a moment ago, I saw that I had logged some early evening DX.
Station $18I in Upernavik, Greenland, sent a met forecast message at 20:24 EST. / 01:24 UTC.
Google Maps puts it around 3500 km. from me.

73, Bruce, VE3EAR

Subject: [navtexdx] 20:20 UTC 4209.5 XVN Nhatrang Radio, VTN

Hi all,

Just in on 4209.5KHz. TAH Istanbul have switched their channel marker off. Interesting DX is then possible.

Regards - Dirk

Hi Roby, I have logged Varberg, Las Palmas and Izmir recently at the same time as this UNID, (see example logs below), so I assumed those stations could be discounted. A lot of assumptions, and as we know, 2+2 sometimes adds up to 5.
It is fortunate that more stations do not transmit 'No messages on Hand', and without an ID I cannot see the point anyway?

Hello Roberto, I have logged this UNID 9 times in about 3 weeks. The only thing I can add is that I don't think it is Varburg, Las Palmas or Izmir, because in at least one of those logged time slots each one has sent a message. So in theory that leaves Upernavik (Grn), Port Elizabeth (AFS) or Yokohama (JPN). Upernavik is surely the only possibility? but the decode is usually 100% clean. Mystery! Could it be a test signal?

Hello Roberto, Dirk,

>>> The "no message on hand" messages are unidentifiable, too many
>>> candidates in that time slot. <<<

One can only try....

The UNID has been found here at 21:40 and 01:20 UTC the last couple of weeks, though not every day and not on both antennas. Unfortunately, I have only made overnight recordings on my PERSEUS and the last five nights have been stored.

On December 10 at 01:18 UTC, I have a scrambled decode from Izmir.
At 01:20 UTC a transmission from the Canary Islands starts and is interrupted at 01:20:47 UTC by a stronger station that at several replays produces part of the word "messages" and "on hand".
It is interesting to note that every replay gives a different result and sometimes no result at all!

The station that starts at 01:20:47 UTC is stronger than Izmir and the Canary Islands NAVTEX transmission.
So the conclusion could be that it is either Upernarvik/Disco Isl, GRL or Varberg.
Reception of Upernarvik in Italy with the current state of the T/A propagation is not very likely.
However this is no proof in itself.

To investigate this a bit further I have also looked at the next time slot, 05:20 UTC.
This was interesting as at several days decodes were found from Varberg that started exactly at 05:20:47 UTC.
On closer inspection also proper decodes from Varberg were found in the 21:20 and 01:20 UTC time slots, that also started exactly at xx:xx:47 UTC, the same time our UNID was found.

So, until someone comes up with a better explanation, my guess is that this UNID is Varberg!

73,
Roelof Bakker

Hi all,

interesting log from 490 kHz with some UNID and out schedule.
New one Malin Head,IRL that I didn't receive on 518 kHz.

I appreciate if you can help me, as always.

73, Roby

Hi Dryden,
we could detect the signal levels and combining data from different
listening DXers for groped to identify from where the signal arrives,
but is not simple.

73, Roby

6853. Navtex Log 8416,5 Mhz test from Lodi, ITA

Yahoo group: navtexdx (2013)
Date: 2013-12-12 15:00:23 UTC
From: Maurizio Marini
Topic: 6853 Message: 6853

Hello,

today I have tried reception on 8416,5 Mhz for a couple of hours.

This is what I have decoded (Honolulu and Boston...I think):

```
YYYYMMDD HHMM KHz ID CALL STATION,COUNTRY DIST (Km)
--------------------------------------------------
20131212 1404 518 $12O NMO Honolulu ,HWA 12511

6854. Re: [navtexdx] Navtex Log 8416,5 Mhz test from Lodi, ITA

Yahoo group: navtexdx (2013)
Date: 2013-12-12 15:14:11 UTC
From: Dirk Claessens
Topic: 6853 Message: 6854

Hello Maurizio,

All messages with the O identifier are from NMO Honolulu.
But, sometimes USCG messages do not have the usual ZCZC header and are sent inbetween other messages.

Have you noticed this one at the end?:

2013-12-12 14:30:50 72> ZCZC

Thank you Dirk,

I have noticed that at the end of last message, another station was
beginning the trasmission.

T/A on 518 Khz is another story and here in Italy it is very hard.

Hi Roelof,
I read your message just now, sorry.

I think your supposing is good.
Upernarvik is very hard for me and Varberg come good in these nights.

We could see again the result in the next session.

73, Roby

6864. NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2013)
Date: 2013-12-13 11:33:32 UTC
From: Roelof Bakker
Topic: 5067 Message: 6864

Hello all,

Hardly any T/A propagation and even NMR, Puort Rico, has gone missing!
There was an enhancement before sunrise from Newfoundland, but no NAVTEX transmission was scheduled at that time.
No static over all of Europe, produced excellent decodes from stations who made it!

Daily log:
